

# POINT OF SALE

**We are Official ODOO Partner**

# Our Profile

**Vperfect CS** is an official partner of **Odoo**. We customize **Odoo** standard modules to create new customized modules by adding additional features to those modules to fulfill our clients requirements.

## **VPerfect CS Serves!**

"Our essence is to serve for your betterment"

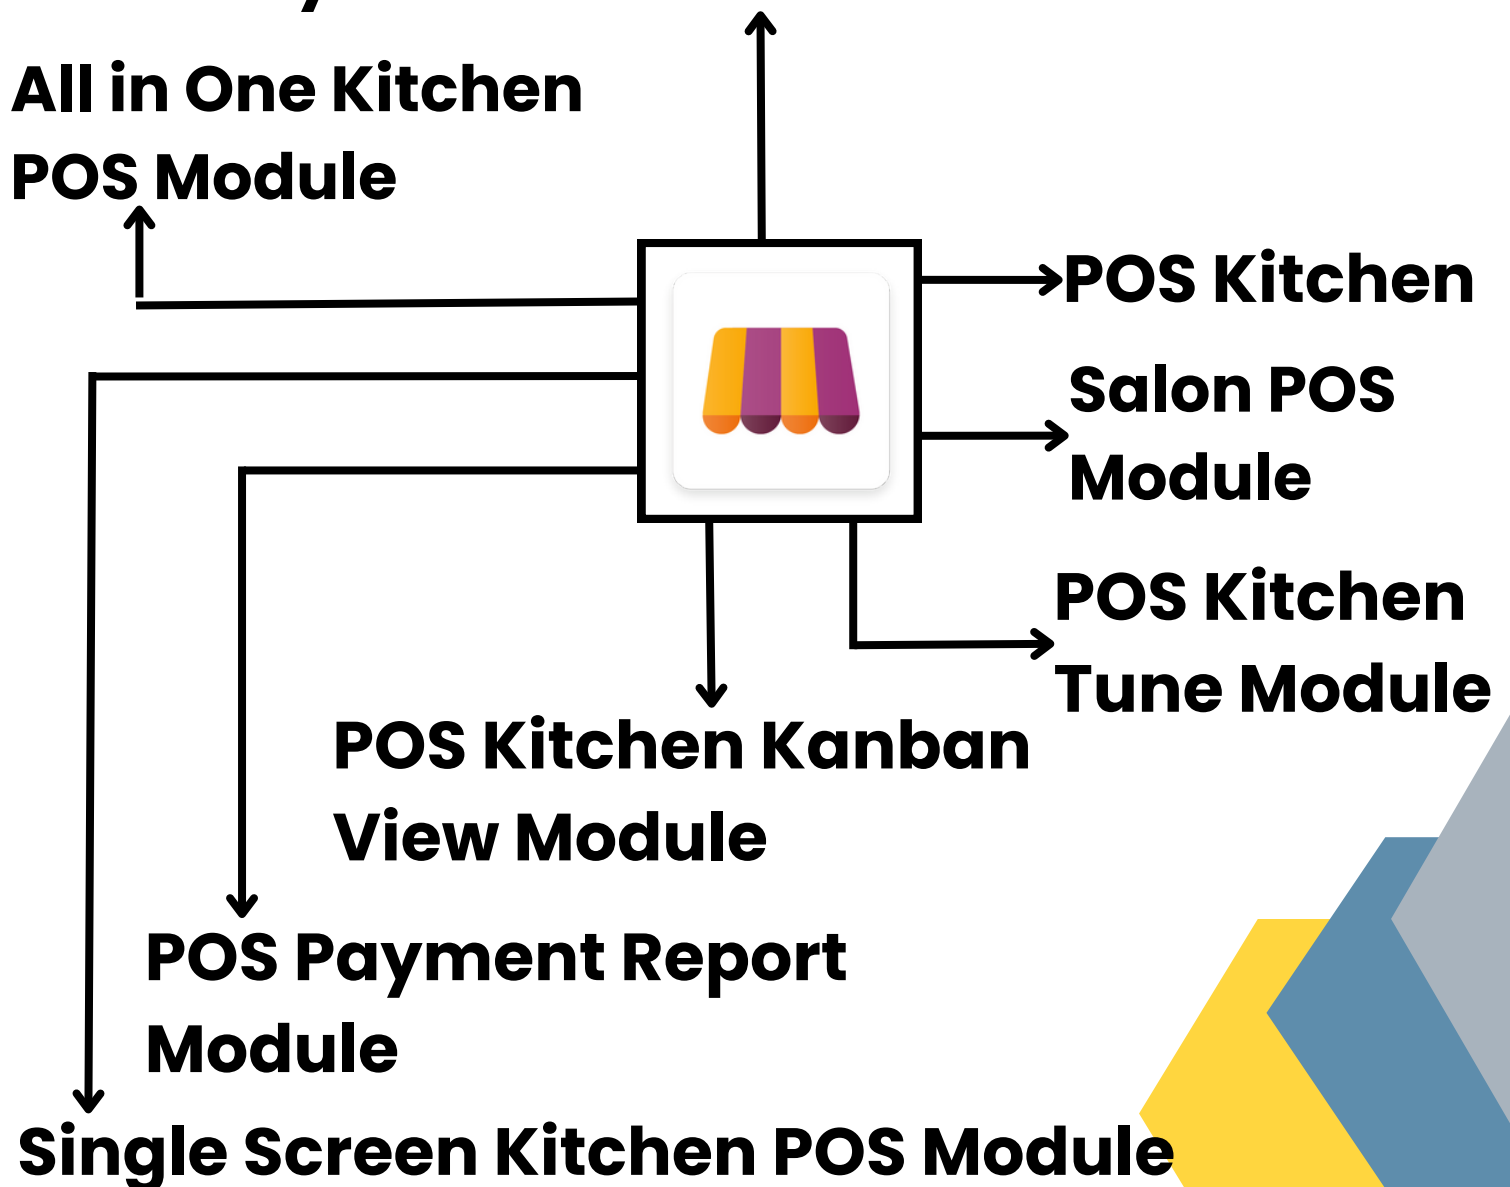

# POS Modules

- **VPCS** has developed the following modules shown below for their proficient clients to manage their point of sale

## Point of Sale

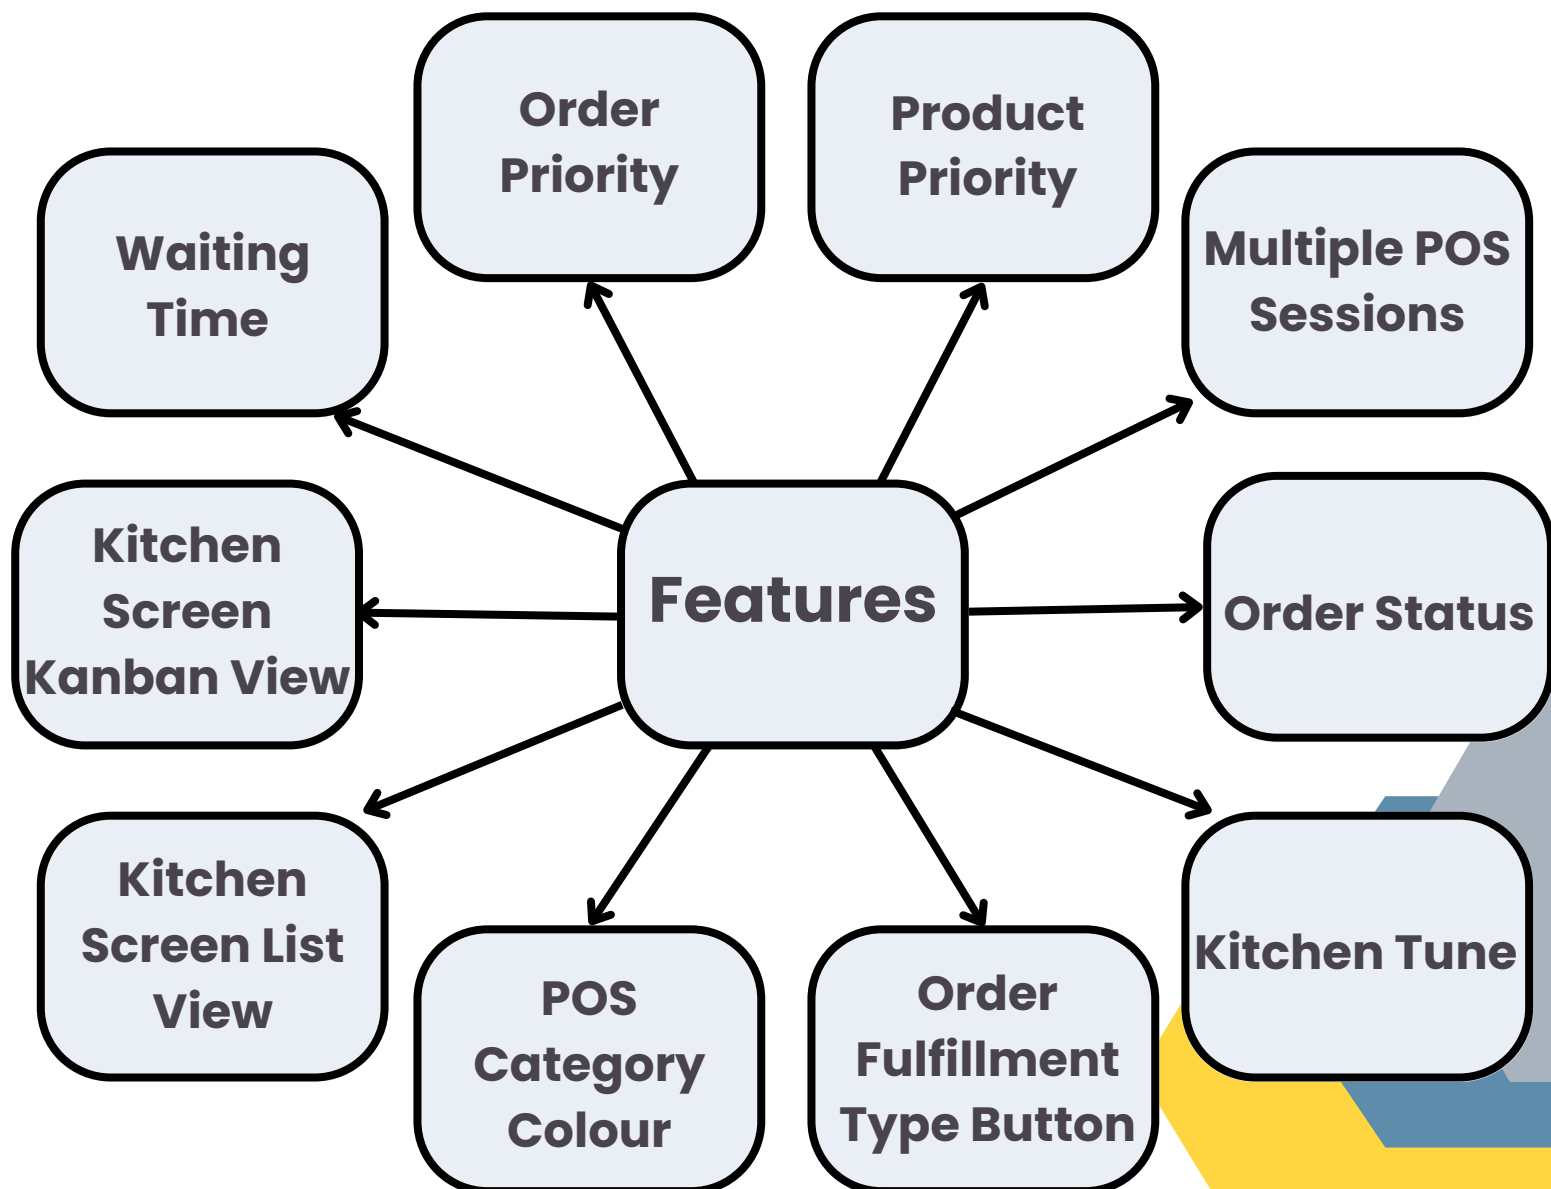

### Multi-session Restaurant Sync POS Module

### All in One Kitchen POS Module

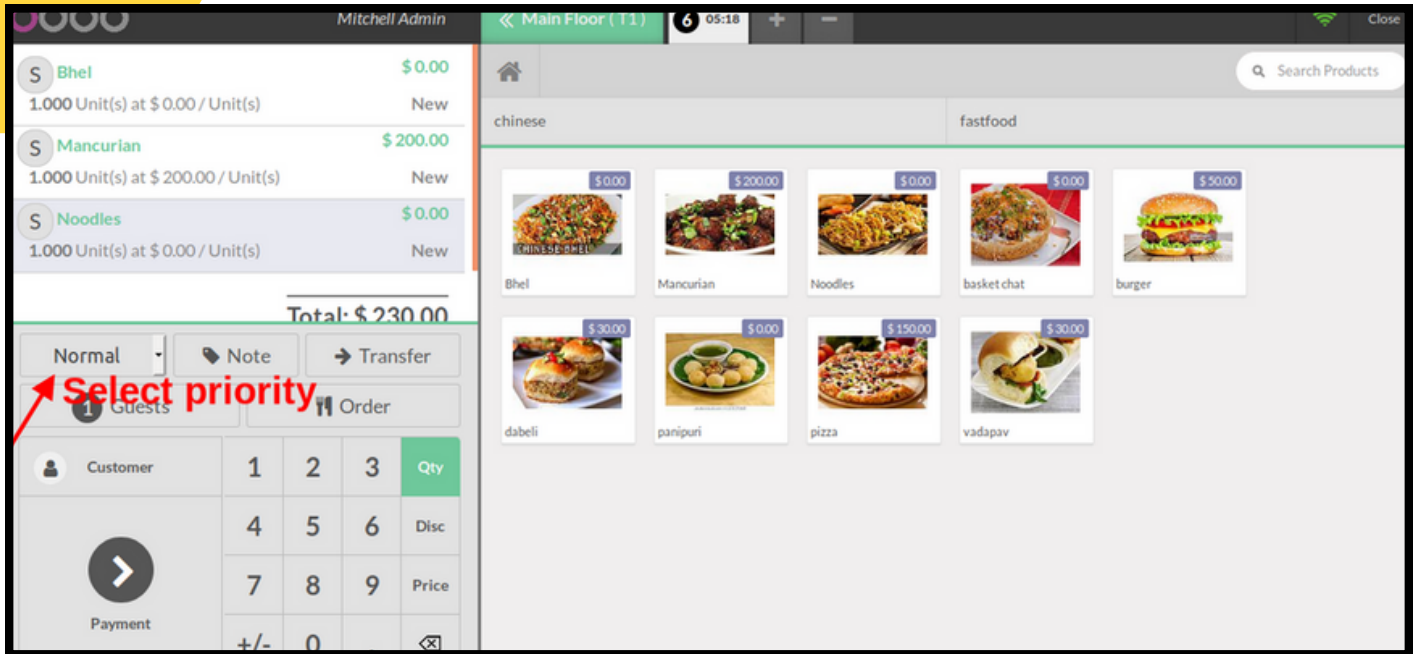

# All in One Kitchen POS

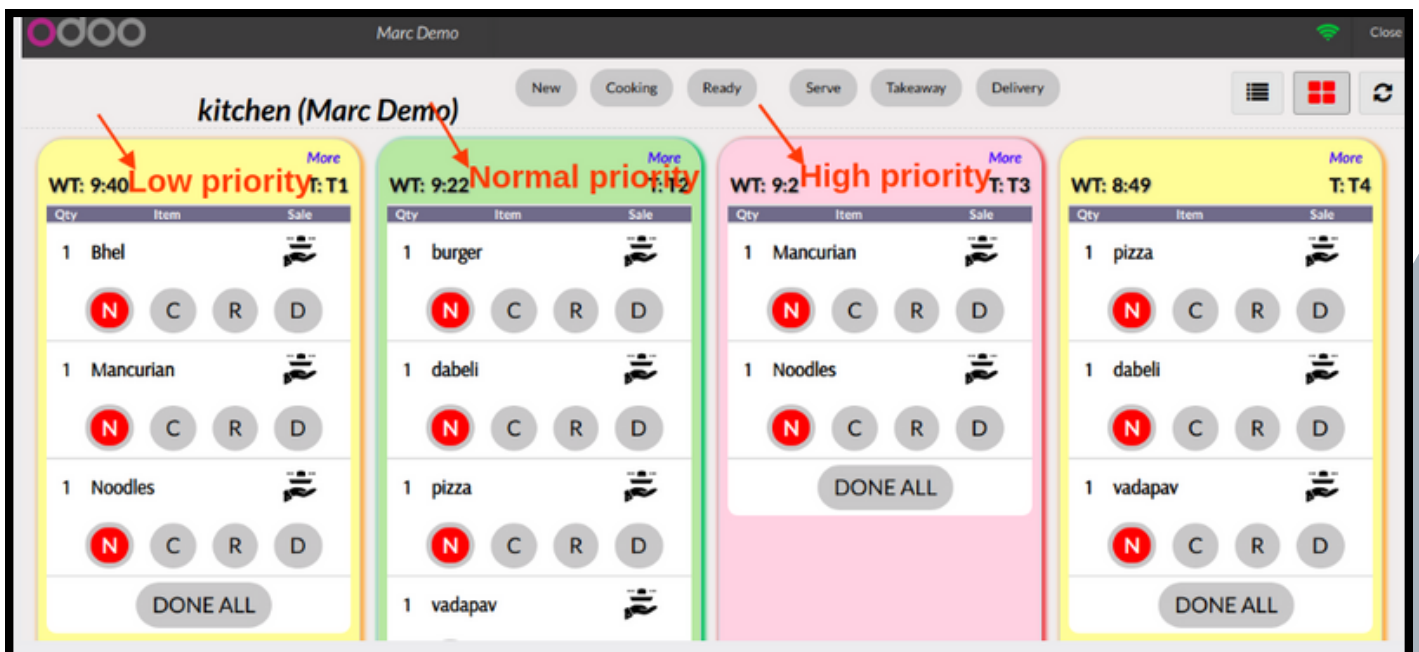

- This module comes with a bunch of features capable of catering to all the possible requirements for a **POS Kitchen**

- These features are explained in detail in below:
- **Order Priority:** The user can configure the **Order Priority** before sending the order to the kitchen

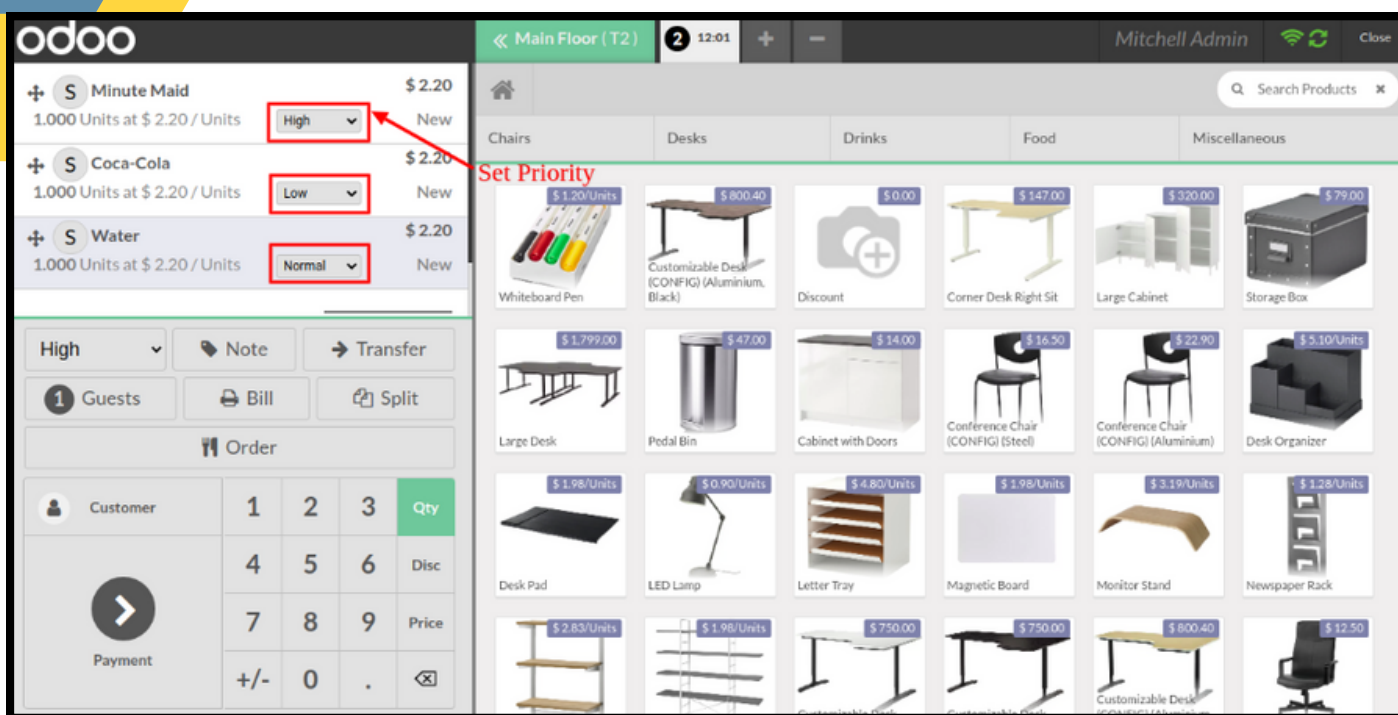

- The figure below shows the **Kitchen Screen** showing the orders based on **Order Priority** which can be done by configuring the **Priority Colour** for each **Priority Type**

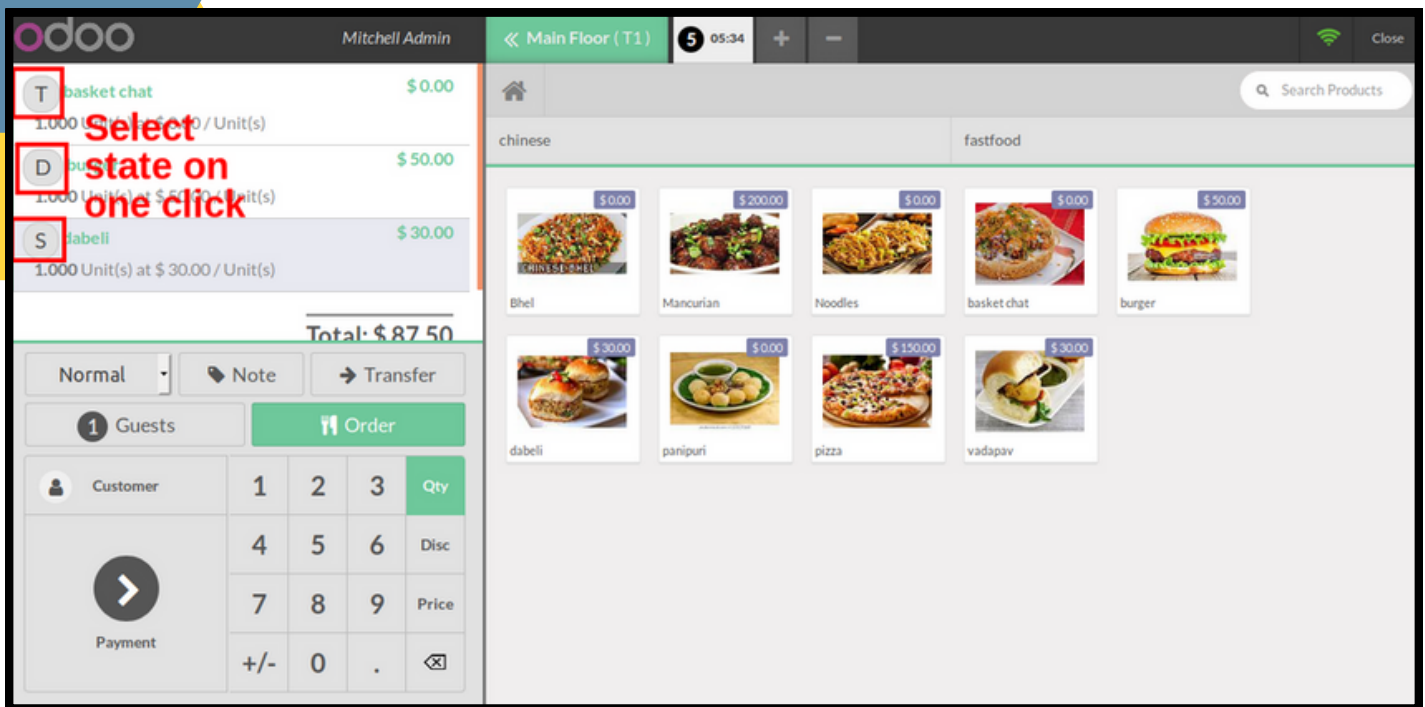

- **Product Priority:** The user can also configure the **Product Priority** when selecting the products as **Order Line** before sending the order to the kitchen

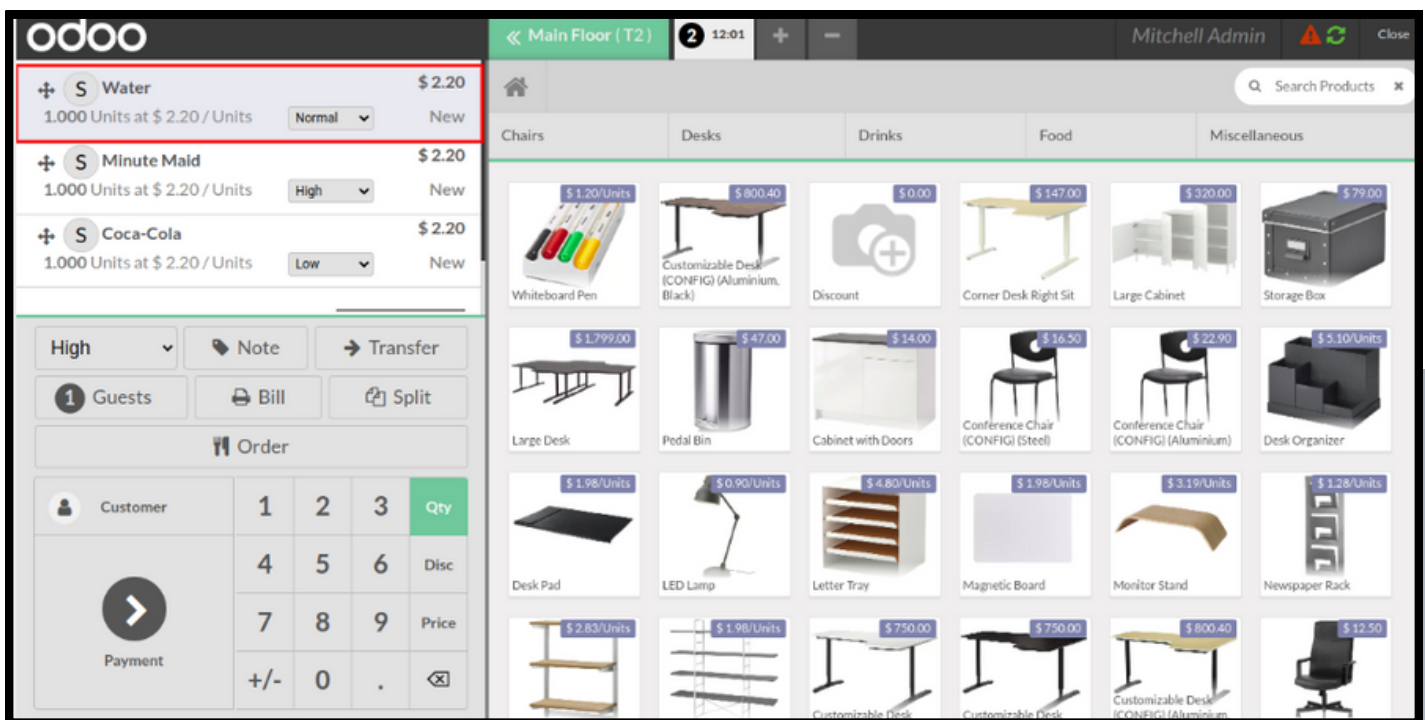

- **Kitchen Tune:** The module also has a feature of configuring a **Kitchen Tune** whenever a **New Order** is received on the **Kitchen Screen**
- **Order Fulfillment Type Button:** The user has the option of choosing the **Order Fulfillment Type** by clicking on the small button on the left of the selected product
- The **Order Fulfillment Type** or **State** can be **Serve** or **Takeaway** or **Delivery**

- The figure below the feature of **Order Fulfillment Type** button

- Product Sequence:** The user can also set the **Product Sequence** of products while generating an order by dragging the items using the “+” icon

- **POS Category Colour:** We can set a colour for each category of our POS which is displayed as a background colour on the kitchen screen

The screenshot shows the 'Kitchen (kitchen2)' interface. At the top, it displays 'Order Type: Main - T1', 'Order: 00004-032-0018', 'Order Placed: 06:15', 'Waiting Time: 6:31', and 'Priority: Normal'. Below this is a table of items:

#	Item Name	Category	Note	Quantity	Status
1	Biryani	Non-Veg		1	New Cooking Ready To Serve Done
2	Butter chicken	Non-Veg		1	New Cooking Ready To Serve Done
3	Palak paneer	Veg		1	New Cooking Ready To Serve Done
4	Naan Roti	Veg		1	New Cooking Ready To Serve Done
Total				4	

The background color of the table rows is determined by the category: Non-Veg items are highlighted in red, and Veg items are highlighted in green.

- It can be seen from the above figure that it displays the **Vegetarian** category in **Green colour** while the **Non-vegetarian** category is shown in **Red colour**
- The module also provides **Kanban View** and **List View** on the kitchen screen
- **Kanban View**

The screenshot shows the 'Kitchen (Demo User)' interface with multiple Kanban boards. Each board represents an order and shows items with their status and category. The background color of the item cards is determined by the category: Non-Veg items are red, and Veg items are green.

**Order: 00002-006-0004 (Table: T3)**

#	Item	Category	Note	Qty
1	Butter Chicken	Non Veg		2
2	Naan Roti	Veg	Plain Roti	5
3	Salad	Veg		1

**Order: 00002-006-0005 (Table: T4)**

#	Item	Category	Note	Qty
1	Daal	Veg		1
2	Naan Roti	Veg		3
3	Omlet And Bre...	Non Veg		1
4	Salad	Veg		1

**Order: 00002-006-0006 (Table: T5)**

#	Item	Category	Note	Qty
1	Mushroom Soup	Veg		5
2	Salad	Veg		2
3	Omlet And Bre...	Non Veg		5

**Order: 00002-006-0002 (Table: T1)**

**Order: 00002-006-0003 (Table: T2)**

# Multi-session Restaurant Sync POS

- The **Odoo** standard module allows the user to work on a single session in **POS** at a time

- To operate multiple sessions simultaneously for a **POS**, we at **VPCS** have developed a module that allows the user to have multiple sessions in their **POS** that instantaneously syncs all the data from all the sessions to be made available to the user at their desired place in the system to have some useful insights

- The picture below shows the module with multiple ongoing sessions in **POS**

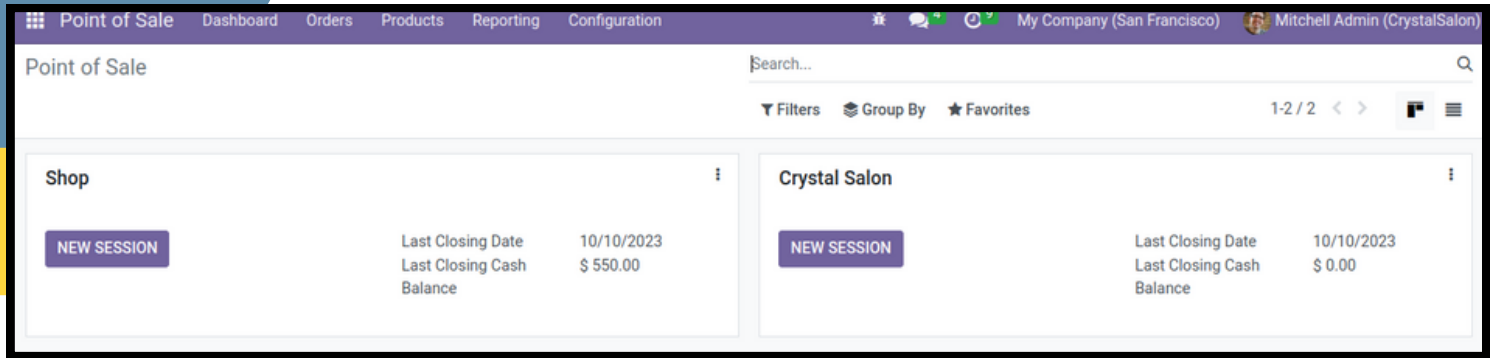

# Salon POS

- This module allows the user to manage a **Salon** as a **POS**
- This module is specially designed for salons with the features of **Odoo** standard **POS** module

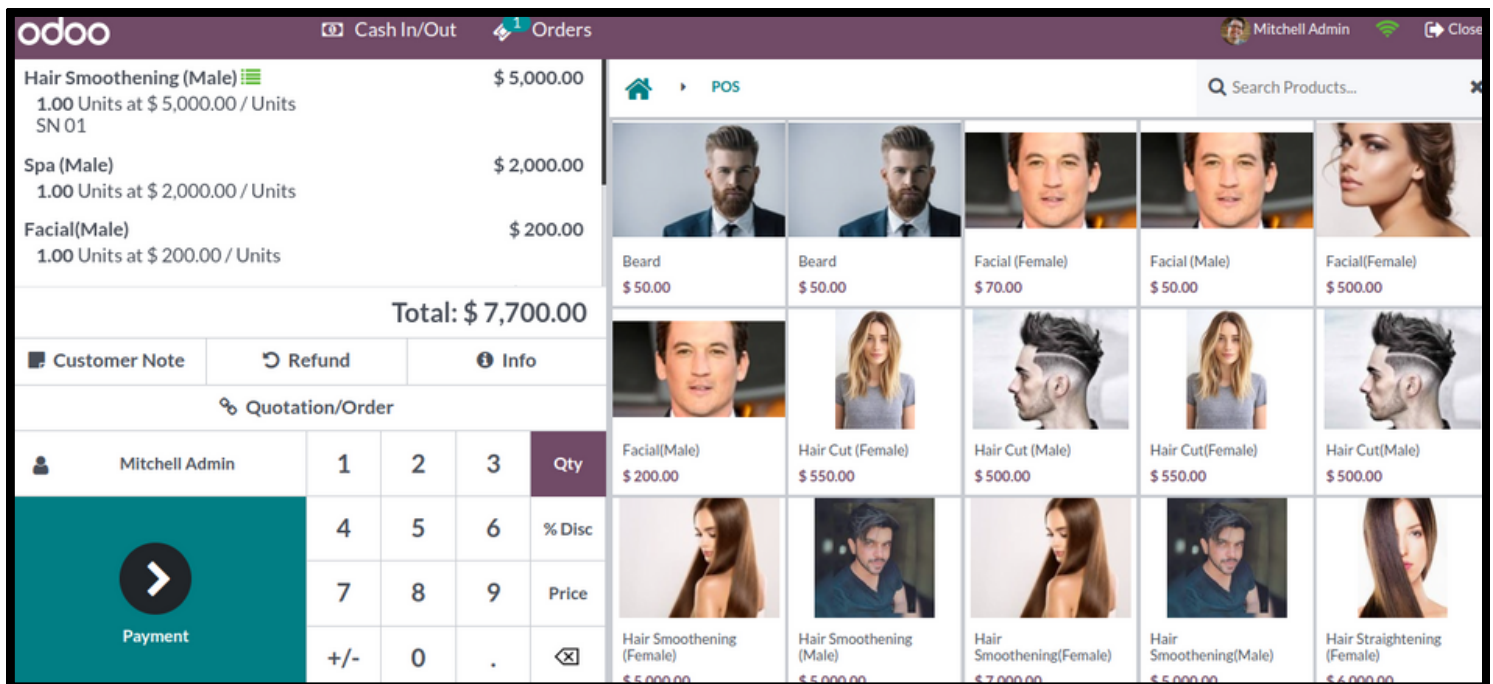

- The product should be configured as a **Service** and is made available in **POS**
- When an order is confirmed in **POS** a **Sale Order** with **Invoice** is automatically generated in the system
- A **Salon Request** is also created in the system if the the **Salon Booking Management Module** of **VPCS** is also used in the organisation

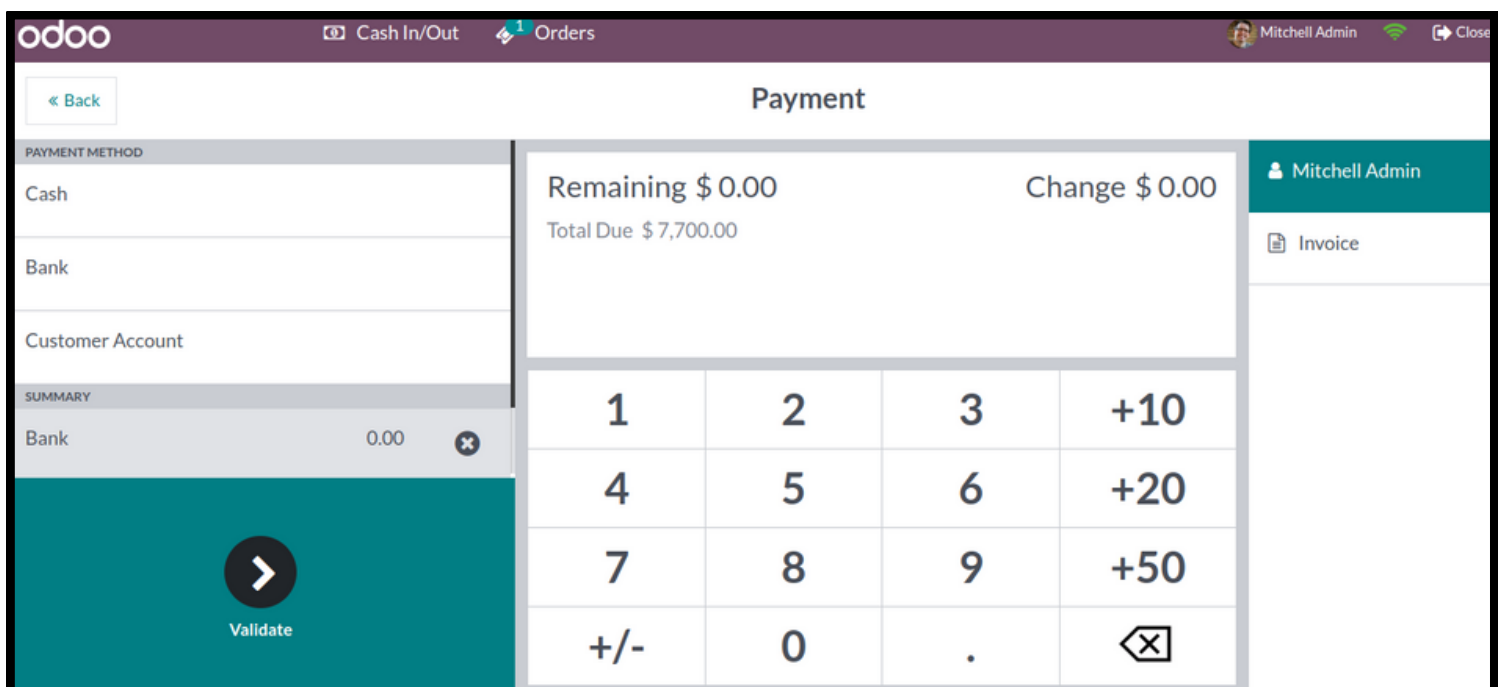

- The figure below shows the **Salon Dashboard**

- POS Screen**

- Payment Screen**
